

## Besicomm Terminal App Change of Cost Center

The Besicomm App works not only on smartphones and tablets, but also on the current Android based dormakaba terminals. Thus all Besicomm Mobile App configurations are automatically available on the dormakaba terminals. One of them is the change of cost center. This makes it easy to record bill of exchange entries for cost centers, internal orders and projects and report them back via the HR-PDC interface. This makes it easy to assign costs to employees. The same app also works for other objects such as orders/items, but the transfer of objects and their evaluation must be adapted here.

Example screen to select a new purchase orders by list, scanner and keyboard:

Max Muster	Auftrag selektieren	9 38 38 28.6.2019
<b>Nummer</b>	<input type="text"/>	
450069465400010 Dienstleistungen		
450069464700010 Konstruktionsdienste Ingenieur		
450069464200010 Montagearbeiten Ingenieur		
450069464200020 Projektleiterdienste		
450069466000010 Projektleiterdienste		
450069463300020 Service Ofen		
450069465600020 TEst2
