

Besicomm Terminal Timesheet

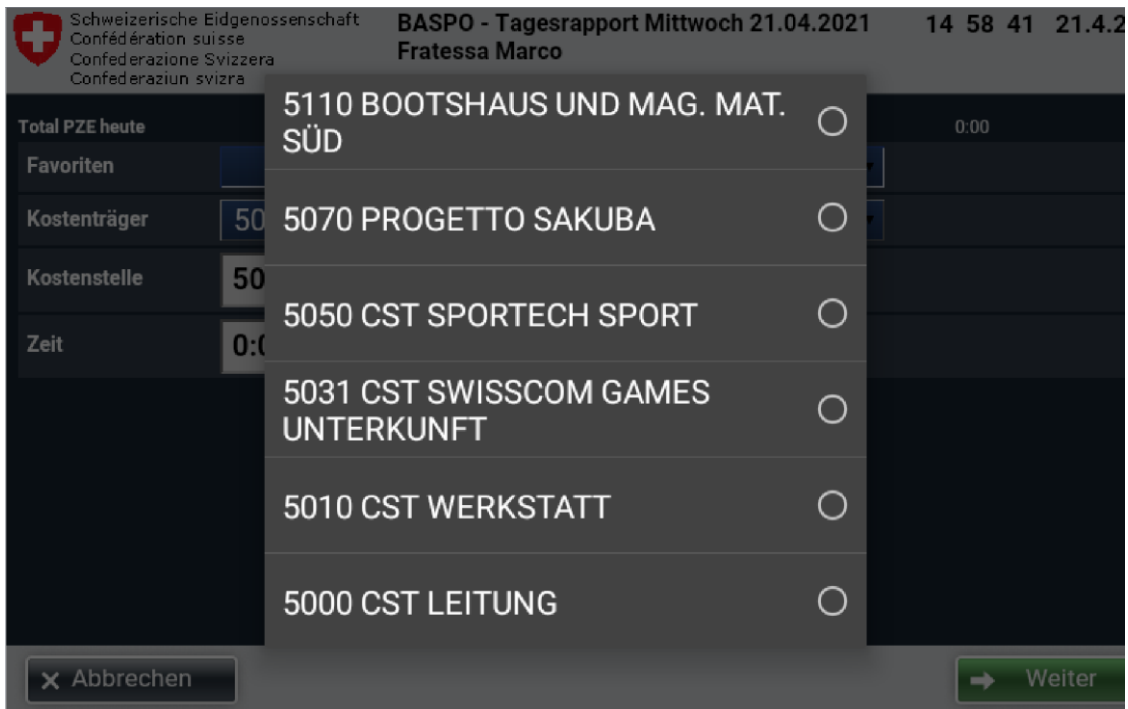

The Besicomm app not only works on smartphones and tablets, but also on the latest Android-based dormakaba terminals. This means that all Besicomm Mobile App configurations are automatically also available on the dormakaba terminals.

One of these is the Timesheet recording into SAP CATS or as a direct CO internal order. The employee books "In/Out" (P01) or "In" (P10) and "Out" (P20) events as usual. In a specific page, he can post the hours accumulated in this way to an internal order, a cost centre or any CATS object.

Example of a report by list, scanner and touchscreen. The currently available presence time is always suggested:

 Schweizerische Eidgenossenschaft Confédération suisse Confederazione Svizzera Confederaziun svizra		BASPO - Tagesrapport Mittwoch 21.04.2021 Fratessa Marco		14 56 17 21.4.2021	
Total PZE heute	0:03	Totale Zeit auf Kostenstelle	0:00		
Favoriten	<input type="text" value=""/>				
Kostenträger	<input type="text" value="5110 BOOTSHAUS UND MAG. MAT. SÜD"/>				
Kostenstelle	<input type="text" value="5110"/>				
Zeit	<input type="text" value="0:03"/>				
<input type="button" value="× Abbrechen"/>		<input type="button" value="→ Weiter"/>			

In the drop-down menu, a cost unit can be selected from the favourites or from all objects. It is also possible to enter the cost unit by scanner or numerical code:

In the overview, the employee sees his or her attendance time and the time already booked:
