Boxed Besicomm

The Box connects dormakaba access and time recording hardware with SAP SuccesFactors via jay cloud. Boxed Besicomm is also suitable for classic SAP HCM connections and solutions with mixed operation. The box contains all necessary Besicomm modules already pre-configured and replaces a local server installation. It contains a variety of templates for common door configurations and ready-made solutions for time clocking on terminals. This reduces installation costs. With integrated remote support, update functionality, automated backup and system messages, we can offer an extended service.

Boxed Besicomm at a glance:

- Predefined Besicomm solution for time, access and shop floor data collection
- Rental model including service from our support team
