

dormakaba **Terminal 96 00**

Time recording and
access control in a
compact design

The perfect starter solution – beautifully simple

Secure straightforward time recording, door control and modern employee communication – all are combined in the dormakaba Terminal 9600. This extendable versatile solution comes in a compact design and is distinguished by a high degree of stability.

Thanks to protection class IP65, with its rugged housing and impact-resistant glass front, the terminal is dust- and waterproof – and thus particularly durable. The user interface can be customised and designed in the corporate look with company content and applications.

Add-ons like CardLink extend the function scope as required for a perfect match. And, best of all: thanks to 1-click installation and PoE, Terminal 96 00 can be installed at the turn of a hand – ready for immediate use.

Maximum freedom of design – you choose the look and acoustics you want

Terminal 96 00 not only offers elegant looks. The user interface is also a hit with its attractive modern design. Would you rather choose the look and acoustics yourself? No problem at all. You can customise the user interface to suit yourself in a few easy steps for a look as original as your company.

Preset display layouts and standard signal sounds are out: instead you decide how your terminal looks and sounds with your own colours, background images, logo, icons, apps, acoustic signals or multimedia content.

encrypted data transfer and memory capacity
for up to 10,000 people

CardLink

The dormakaba Terminal 96 00 supports CardLink and is always up-to-the-minute thanks to regular CardLink updates. You can therefore easily connect the digital door components in your stand-alone access control system to an online access solution. This creates a comprehensive security solution with no additional wiring.

A small solution is better than none at all – our compact solutions for very small businesses

Our dormakaba Terminal 96 05 and 96 10 models are lean solutions for small businesses. These terminals with basic functions grow with you and can be easily extended to cope more employees and new requirements.

dormakaba Terminal 96 05 **The small starter solution "access control"**

Directly transfers access control rights to employee IDs via CardLink

dormakaba Terminal 96 10 **The small starter solution "time recording"**

Easy reliable data acquisition for companies with up to 50 employees
