dormakaba jay cloud

## How Can Companies Digitize Their Security Systems?

Access control and time recording based on the SAP Cloud Platform

With **jay cloud**, companies can easily organize and administer the entire time management and access control system in their SAP system.

jay cloud allows to manage these important and sensitive corporate tasks with a high degree of security - directly from SAP®SuccessFactors Employee Central.

jay cloud thus combines the strengths of the two leading providers of ERP software and access and security solutions: **SAP and dormakaba**.

It is paving the way for our customers as they work toward digital transformation.

Device integration with **SAP IoT Application Enablement**

Solution Extension for **SF Employee Central**

SAP®SuccessFactors

Time recording, access control and device management

Direct and real-time control from SAP SuccessFactors EC

jay cloud communicates via the SAP Leonardo IoT Platform with the connected dormakaba time and access devices and provides them with personal master data and authorizations.
The time and access bookings recorded at the terminals are stored in SAP Leonardo and are available for comprehensive evaluations.

Co-Innovated with SAP
The solution jay cloud was developed and certified together with SAP as part of the SAP Co-Innovation Program as Solutions Extension for SuccessFactors Employee Central.

Co-Innovated with SAP®
SAP® Certified
Built on SAP Cloud Platform

The advantages at a glance

Direct integration into SAP SuccessFactors EC

Access rights are assigned automatically based on the role and function of an employee in the company. If the role of the employee changes, his access rights are automatically changed.
There is no longer a need for a subsystem for access control.

Based on the SAP Cloud Platform

jay cloud supports your company in the digital transformation.
jay cloud is a service based on the SAP Cloud Platform.
Your applications are safe and always up to date.

Simple device integration

Convenient connection of the entire dormakaba product portfolio, including:
- Electronic access control
- Time and operating data recording
- Locking systems
- Entrance systems
- Identification technologies (RFID systems, mobile access, biometric identification)

Simple graphical interface

jay cloud provides a user-friendly, customizable web interface.
Access is always available from everywhere, with PC, tablet or smartphone. Your employees will be happy to work with it.

Worldwide service and sales

Through our partner concept, the cooperation with dormakaba, SAP and SAP consulting houses, we can provide a worldwide service.

Investment security

SAP is the world's leading manufacturer of ERP software. dormakaba is a leading manufacturer of security solutions. Both companies stand for innovation, customer orientation and long-term strategies.
